## All Data Analysis Tools

### Arrest Data Analysis Tool

This dynamic data analysis tool allows you to generate trend tables and figures of arrest data since 1980, including national arrest estimates and agency-level underlying data are from the FBI's Uniform Crime Reporting (UCR) Program.

[Arrest Data Analysis Tool Home Page \(Updated with 2013 and 2014 data\)](#) (Resource Link)

### Census Bureau Population Estimates

U.S. Census Bureau population data estimates.

[Codebooks and Datasets](#)

### Corrections Statistical Analysis Tool (CSAT) - Parole

This dynamic analysis tool allows you to examine data collected by the Annual Parole Survey on persons sentenced as adults who were conditionally released by mandatory conditional release, through other types of post-custody conditional supervision, or as the result of a sentence to a term of supervised release.

[Corrections Statistical Analysis Tool \(CSAT\) - Parole](#) (Resource Link)

### Corrections Statistical Analysis Tool (CSAT) - Prisoners

This dynamic analysis tool allows you to examine national and jurisdictional prisoner data for both federal and state correctional authorities. You can view by legal jurisdiction, physical custody in private facilities and local jails, imprisonment rate, citizenship status, prison capacity, juvenile or adult age group, and

[Corrections Statistical Analysis Tool \(CSAT\) - Prisoners](#) (Resource Link)

### Corrections Statistical Analysis Tool (CSAT) - Probation

This dynamic analysis tool allows you to examine data collected by BJS's Annual Probation Survey on all adults, regardless of conviction status, who have been placed on probation as part of a court order.

[Corrections Statistical Analysis Tool \(CSAT\) - Probation](#) (Resource Link)

## Corrections Statistical Analysis Tool (CSAT) - Prisoners

[Home](#) [Quick Tables](#) [Custom Tables](#) [Methodology](#) [Terms & Definitions](#) [Supporting Documents](#) [FAQs](#)

This dynamic analysis tool allows you to examine National Prisoner Statistics (NPS) on inmates under the jurisdiction of both federal and state correctional authorities.

You can instantly generate tables of numbers and rates of national and jurisdictional statistics, from 1978 to the most recent year that NPS data are available. The web tool includes state-level prisoner data from the 50 state departments of corrections, the Federal Bureau of Prisons (BOP), and the District of Columbia (until 2001, when sentenced felons from the District became the responsibility of the BOP).

The pre-set [Quick Tables](#) show you trends in prisoner statistics and provide links to key tables in the most recent BJS publication on the U.S. prisoner population. If you would like more detail, use the [Custom Tables](#) to analyze yearend populations, admissions, or releases.

You can create custom tables of yearend populations by the number of inmates in custody or under legal jurisdiction, those held in the custody of private facilities and local jails, the imprisonment rate of prisoners sentenced to more than 1 year, and noncitizens and juveniles in prison. You can customize tables of prison admissions or releases by many variables. All custom tables can be analyzed further by the prisoner's sex. You can find more detail under [Terms & Definitions](#).

The [FAQs](#) provide answers to the most commonly asked questions. This [User's Guide](#) provides everything you need to get started.

# Quick Tour

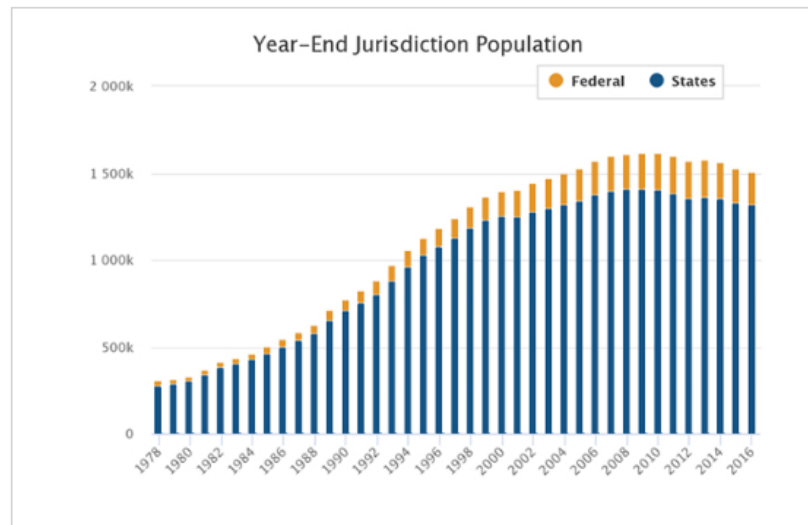

## Overview

The Bureau of Justice Statistics (BJS) compiles comprehensive information on offenders sentenced to state and federal prisons, through the National Prisoner Statistics (NPS) survey and the National Corrections Reporting Program (NCRP). BJS has made these data available through the CSAT-Prisoners tool, an interface developed and maintained by Abt Associates Inc. CSAT-Prisoners can generate various statistics, figures and maps on prison admissions, prison releases, and year-end prison populations between 1978 and 2016.

## Frequently Requested Charts

View selected pre-formatted charts showing long-term trends in prison admissions, releases and yearend populations, and the most recent data on characteristics of persons admitted to prison, released from prison, and in the year-end prison population.

## Map Query

The interactive map feature shows data that states reported in the annual National Prisoner Statistics (NPS) survey. Use the controls on this page to select a variable to map, a year, and whether to show population figures, per capita rates, or the percentage change between two years.

Select Variable:

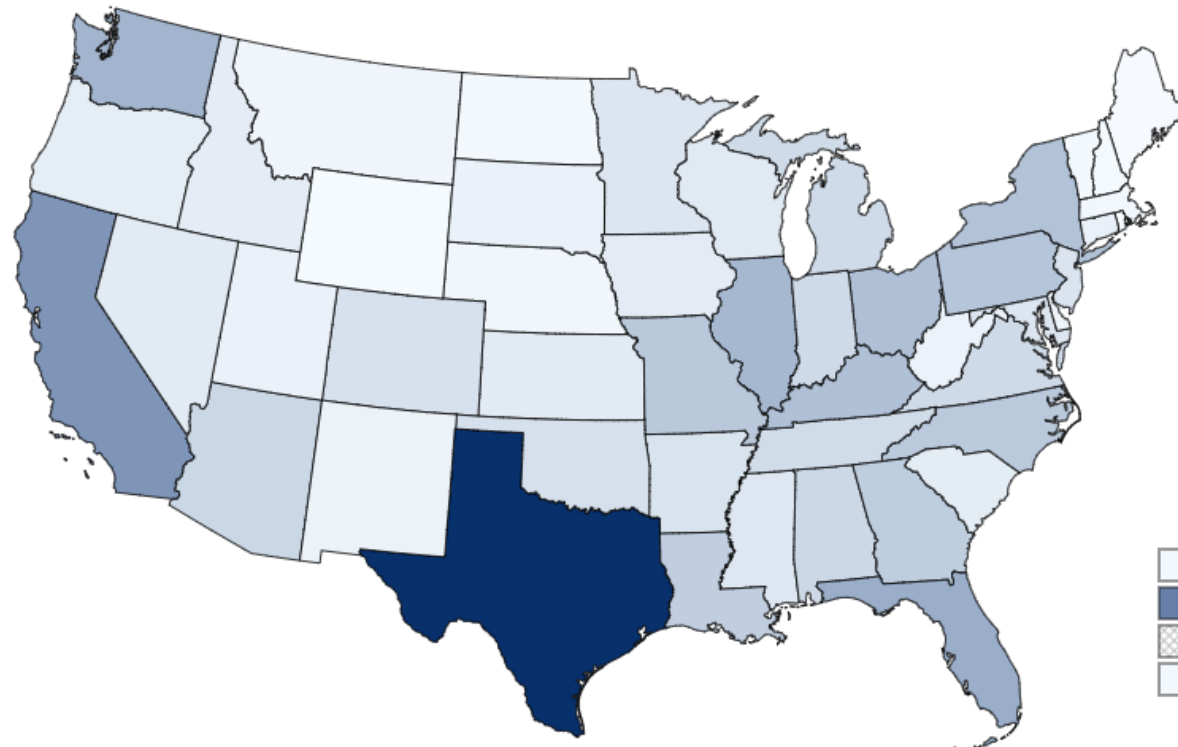

Total Admissions ▼

☐ Per 100,000 State Residents

☐ View Percentage Change (Select the start and end year by dragging your mouse above the year timeline)

☐ Show Footnotes

### Total Admissions (2017) (Preliminary Data: Do Not Cite)

## Advanced Query

With the Advanced Query, you can create three types of custom tables: (1) annual counts of admissions, releases, and year-end populations in state and federal prisons from the National Prisoner Statistics (NPS) survey; (2) characteristics of persons admitted to state prisons, released from state prisons, or in the year-end state prison populations, from the National Corrections Reporting Program (NCRP); and (3) 50-state admission, release, and year-end population statistics from the NCRP. See the [Methodology](#) page for more information on these data.

csat.abtassociates.com says

Users are cautioned against making state-to-state comparisons with CSAT-Prisoners because states have very different offender profiles. Some states have unified prison and jail systems, while in other states only offenders with a sentence of more than one year serve sentences in prison. NCRP only includes offenders serving sentences in prisons.

## Overview

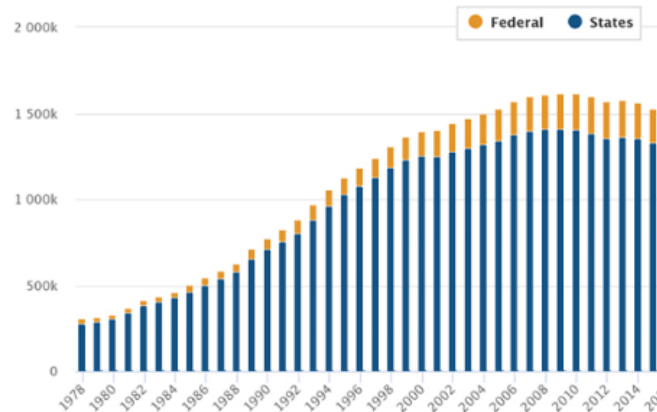

The Bureau of Justice Statistics (BJS) compiles comprehensive information on offenders sentenced to state and federal prisons, through the National Prison and the National Corrections Reporting Program (NCRP). BJS has made these data available through the CSAT-Prisoners tool, an interface developed by Associates Inc. CSAT-Prisoners can generate various statistics, figures and maps on prison admissions, prison releases, and year-end prison populations.

## Frequently Requested Charts

View selected pre-formatted charts showing long-term trends in prison admissions, releases and yearend populations, and the most recent data on characteristics of persons admitted to prison, released from prison, and in the year-end prison population.
